**RE: Hi-Tower Oilfield Services Reference Letter**

To Whom It May Concern,

I am writing this letter to recommend the services of Hi-Tower Oilfield Services to you. During the past 3 years Carmacks Maintenance Services Ltd (CMSL) has been working with Hi-Tower Oilfield Services on numerous different landscape and underground drainage projects. Hi-Tower offers high quality services and we have always been satisfied with their work.

Hi-Tower has brought a new and innovative approach to back slope and side slope drainage repairs through the use of straw crimping that has proven to be very effective for our needs. This approach alleviates the need for such soil stabilization practices as coco-matting, silt fencing, etc. leaving the repaired area in a completely natural condition with no further need of removing physical barriers. We have employed this approach in numerous different locations and found it to be a great addition to completing these projects.

Hi-Tower is very knowledgeable in all areas of dirt works and drainage and has become an integral partner in the works we perform to keep our project operating as seamlessly as it does.

I would ask that you consider Hi-Tower Oilfield Services for any of your "dirt work" or "drainage" repair needs as I know you will not be disappointed in the caliber of works they deliver.

Sincerely,

A handwritten signature in black ink, appearing to read "Graeme Douglas", written over a large, stylized, circular scribble.

Graeme Douglas | Operations Manager
