RE: Letter of Reference – Hi-Tower Oilfield Services

Over the past three years, we have contracted Aaron Bokenfohr from Hi-Tower Oilfield Services to work with us on the Northeast Anthony Henday Drive (NEAHD) Project in Edmonton, Alberta. Some of the construction services that Hi-Tower Oilfield Services provided included the following:

- Multiple sites of asphalt and concrete removal
- Subgrade base preparation
- Granular base preparation
- Culvert replacements
- Earthworks and grading
- Landscaping and seeding

FDAL (Flatiron-Dragados-Aecon-Lafarge) joint venture was very pleased with the quality of their work and the level of professionalism. They strived to complete all the work in a timely manner while paying close attention to detail and workmanship.

It is evident that Hi-Tower Oilfield Services is a well-qualified Contractor and takes pride in their work. FDAL (Flatiron-Dragados-Aecon-Lafarge) joint venture recommends Hi-Tower Oilfield Services for any similar scope of work and we intend on using their services again in the future.

Should you require further information, please don't hesitate to contact me.

Ibrahim Abunaaj, E.I.T.
