RE: Recommendation for work completed

To whom it may concern:

Last year, Kichton had the pleasure to team up on several projects around the Edmonton area with Hi-Tower Oilfield Services. Hi-Tower had a wealth of experience, equipment and skilled operators/labourers. Kichton was very impressed by their commitment to these projects and could depended on them to complete their work in a timely fashion. The quality of their workmanship was recognized by several of our Superintendents and they recommended them for work Kichton needs to complete in the spring. Kichton has already reached out to Hi-Tower to start planning these upcoming 2020 projects.

Hi-Tower assisted on our projects for asphalt & concrete repairs, grading, culvert installations, drainage, erosion control, landscaping and seeding. Hi-Tower's equipment was in good shape and there were no issues with equipment downtime.

Aaron Bokenfohr (owner of Hi-Tower) also assisted in planning and searching out other opportunities and resources required for these projects. Aaron is very professional to work with and always had ideas on how we could be more productive and would help trouble shoot issues when it was required. I look forward to working with Aaron again in the future and wish his company all the success.

In closing, I highly recommend Hi-Tower Oilfield Services to your company and I will utilize their services in the future.

Sincerely,
